**Subject:** FW: 13-0048 - McAllister Creek Hatchery Demolition project - Comments  
**Attachments:** 13-0048.pdf

**Importance:** High

Dear Sonia Mendoza, Elizabeth Weldin, and Deborah Cornett:

The Washington Department of Fish and Wildlife appreciates receiving your comments regarding the McAllister Creek Hatchery Demolition (Ecology SEPA No. 13-0048). I have spoken with Project Manager Tim Ward and we are in agreement:

- 1) WDFW will follow Ecology's recommendations regarding sampling for potential soil contamination at the site. We have reviewed the guidance documents, will accomplish the soil sampling, and soil sampling results shall be sent to the local land use permitting agency and Ecology for review. Should any follow-up be required WDFW staff will follow-up with copies to Ecology and other applicable regulatory agencies.
- 2) WDFW also will adhere to, and is proactively implementing, erosion control measures prior to and during any clearing, grading or construction. A Temporary Erosion Control Plan will be followed during the demolition.

Respectfully submitted,  
Douglas

Douglas Mackey
